

# LEAVES

## MAKE GREAT TOMATOES

If there is such a thing as magic substance, compost is that thing. It loosens clay soil, builds up sandy soils, helps soils drain better or helps soils hold more moisture. And, if you're growing tomatoes, it just can't be beat! We'll cover how composting works, what kinds of bins to use and how to add compost to your garden.

We will be working on the farm, so please dress for the weather and wear closed toed shoes. This is a hands on class, so be prepared to spend most of the time in the field. A water bottle and gloves are also recommended.

## HOME COMPOSTING

**Wednesday, October 3**  
**6:30 p.m.-9:30 p.m.**

**Lomax Incubator Farm**  
**3445 Atando Rd., Concord, N.C.**
